A perfect BALANCE

THIS IDYLIC COASTAL HOME IS THE
IDEAL PLACE TO MAKE MEMORIES

BY ANÉL LEWIS • PROJECT CONSULTANT GRANT VAN WILLINGH
PROPERTY COORDINATOR NOSIPHO KWEYAMA • PHOTOGRAPHER MALITZA DE KOCK

THERMO FIRES 021 200 7660

ABOVE: Manufactured from quality hot-rolled mild steel, the 1500 Delux built-in braai from **Thermo Fires** ensures the best in home entertainment. Offering smoke-free use, the braai is perfect for this indoor entertainment area. It is stylish and functional, with adjustable grids that make it possible to cook different meats simultaneously.

BELOW: **Crontech Consulting** is a leading professional turnkey development firm based on South Africa's West Coast. Specialising in high-end residential construction with an emphasis on bespoke architectural and interior design and decorating, **Crontech Consulting's** professional team ensured that this five-bedroom residence exudes luxury and elegance.

"Warm LED lighting is employed in various ways to enhance different moods in respective spaces."

For this family who loves to entertain, this coastal home was designed to be both glamorous and inviting. A combination of textures and warm, white lighting ensures that the living spaces set the mood to match the occasion. There is a "perfect balance" between a striking aesthetic and functional pieces, adds the designer. "The owner wanted a space that is both beautiful and comfortable, but not like anything they had before." >

CRONTECH CONSULTING 0861 222 468

"A combination of textures and warm, white lighting ensures that the living spaces set the mood to match the occasion."

This functionality is reflected in the property's exterior where stone cladding and a blend of colours and textures are used to create interest and break apart the mass walls. By using natural elements, such as stone and wood, there is a natural flow between the exterior and the indoor areas.

Standout features include the double-sided fireplace with its floating Infinity stone-cladded feature and the LED lighting that subtly blends the dining room and living room

into an accommodating space. The family spends much of their time together in the upstairs lounge drinking coffee before the start of the day.>

"The home is a timeless blend of elegance and luxurious comfort."

Lighting is a prominent feature throughout the home, from the lighting in the shadow lines of the wood-look ceilings in the dining room and upstairs lounge to the Golden Halo pendant collection hanging over the double-volume foyer. Warm LED lighting is employed in various ways to enhance different moods in respective spaces. Varying styles of pendants and chandeliers have also been used to add a functional, artistic touch to each room.

One of the challenges of this build was the higher-than-desired natural ground levels around the swimming pool. The owner resolved this issue by creating a sunken seating area that provides shelter from the wind and a view of the pool's waterfall rimflow edge, clad with custom tiles from Kalki Ceramics.

The property, located within a luxury country estate, is ideally suited to the family's social lifestyle, with plenty of open-plan spaces for them to entertain. "The home is a timeless blend of elegance and luxurious comfort. It speaks to how the owner wants to enjoy and share the beautiful moments in life with family and friends." 🏡

The Thermo De Luxe Braai range has seen a lot of upgrades through the years.

Available in 5 standard sizes: 800mm, 1000mm, 1200mm, 1500mm and 1800mm. All De Luxe braais are supplied with a 304 stainless steel polished grid. Our De Luxe range is also available as Combination braais, Gas Braais, Spitbraais, Freestanding braais and Double-Sided braais. Our newly updated braai has turn-knobs to "lock" the doors and rear-mounted grid hooks with 6 x heights. From 1200mm and larger, our braais are supplied with 2 individually adjustable grids - no more moving the coalmaker.

ABOVE:
800 mm Mildsteel Deluxe with 304 S/S Facade
1200 mm S/S Double-sided Braai
2050 mm Combination braai with added Spit

LEFT:
1000mm Full 304 S/S Professional braai
1200mm Mildsteel Professional with
Stainless Steel Facade
1650 mm 304 S/S Combination Braai
1200 mm 304 S/S freestanding braai on cabinet

Our Professional Braai range has been our most Popular range for the last 5 years, and was designed in answer to the call for braais to fit with new modern spaces. The braai comes with a single door that slides almost fully underneath the ashpan, when you don't want it in your way, but can be pulled out to be utilized as a workspace. Similar to our De Luxe braai range, it has rear-mounted grid hooks with 6 x heights, with a 304 s/s grid. From 1200mm and larger, it has 2 individually adjustable grids - no more moving the coalmaker.

Available in 5 standard sizes: 800mm, 1000mm, 1200mm, 1500mm and 1800mm. Also available as Combination braais, Gas Braais, Spitbraais and Freestanding braais.

The ultimate in braaiing experience, a THERMO braai will add to the value of your home, enhance your entertainment area, and make you the envy of your friends. All our braais are available in mild steel, 3CR12, and stainless steel, as well as a combination of materials.

Need a bespoke braai? See our website for inspiration and contact us to design and manufacture your dream.
